Art Unit: 1745

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 20 August 2007 has been entered.

The following is an examiner's statement of reasons for allowance: The references submitted with the IDS of 20 August 2007 and 27 August 2007 have been reviewed. They have not been found to disclose the presently claimed invention, in which pressure is recovered from the fluid output of a direct methanol fuel cell (DMFC). The references cited in the European Search Report disclose a DMFC that includes a compressor, or a fuel filter "on the basis of zeolites", as the Search Report states. The reference cited to disclose a compressor, Nakanishi *et al.* (US 4,595,642), does not show any turbine or other device that recovers pressure from its output. Nakanishi *et al.* is cited in the IDS of 20 August 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
